SUBJECT INDEX

A

Acetic Acid
  acetate, soil methane, 57(16):4015
  acetate complexation, 57(7):1393
  thermodynamic properties, 57(20):4899
Adsorption
  divalent metals, mackinawite, 57(15): 3635
  Mn^{2+}, mackinawite, 57(1):9
  Pu, Esk Estuary, UK, 57(14):3367
  Th, on Al oxide particles, seawater, 57(10):2169
^{23}Al
  Elephant Moraine 87521, lunar meteorite, 57(15):3793
  meteorites, metal, carbon, silicate, 57(15): 3705
  production rate, meteoroids, 57(10):2361
Alaska, USA
  Resurrection Bay, sediment, 57(4):823
Alberta, Canada
  spherules, Ni-Fe, Pleistocene, 57(16):4129
Albite
  glass, spectroscopic investigation, 57(8): 1753
  synthesis, albite glass, 57(16):3949
Algae
  Botryococcus braunii composition, 57(9): 2053; 57(11):2529
  Tasmanites, oil shale, Tasmania, 57(17): 4205
Allende (carbonaceous chondrite)
  olivine grains, O, isotope composition, 57(11):2649
  PAH, polycyclic aromatic hydrocarbons, 57(4):933
  partial melt, 57(9):2123
Aluminum
  hydrolysis constants, 150–250°C, 57(4): 747
  oxide particles, sorption, Th, seawater, 57(10):2169
  release from spodisol Bs horizon, 57(1):57
  speciation, aqueous solution, 57(13):2929; 57(20):4869
Amazon River
  REEs, geochemistry, 57(10):2181
Amino acid
  adsorption, sediment, 57(4):823
  carbonaceous chondrites, H isotope composition, Strecker synthesis, 57(19): 4713
  decomposition, kinetics, high *T*, 57(14): 3281
  Murchison, carbonaceous chondrite, 57(14):3473, 3475
Ammonium
  granite, Cornubian batholith, England, 57(6):1339
Anatase
  fractionation, O isotopes, 57(13):3083
Anorthosite
  petrogenesis, Nain province, Labrador, 57(16):3925
Antarctica
  ALHA77307, carbonaceous chondrite, 57(7):1521
  ALH85085, CAI, petrology, 57(10):2329; 57(11):2631
  Elephant Moraine 87521, lunar meteorite, 57(15):3793
  eucrite, Yamato 792769, 57(9):2111
  LEW88516, SNC, petrogenesis, 57(19): 4769
  organic compounds, carbonaceous chondrites, 57(4):907
  terrestrial ages, meteorites, Yamato Mountains, 57(8):1857
Apatite
  authigenic, sediment, continental margin, 57(5):991
  chemical composition, variation, Munni Munni Complex, W. Australia, 57(18):4467
  mixing, $Ca_3(PO_4)_2$–$CaCl_2$–CaF_2–$Ca(OH)_2$, 57(19):4663
  REEs
    biogenic, 57(11):2507
    lunar rocks, 57(16):4069
  Sr, diffusion, 57(19):4653
Aquifer
  oxidation, Fe^{2+} to Fe^{3+}, groundwater, 57(9):1987
  redox reactions, Fe, Mn, 57(8):1691
  retardation, radionuclides, ^{238}U and ^{232}Th series, 57(3):597
$^{40}Ar/^{39}Ar$ method
  Asuka 881757, lunar meteorite, 57(19): 4687
  granite, Cornubian batholith, 57(8):1822
Arabian Sea
  anoxic deep water, Pleistocene, 57(5): 1009
Argon
  Lau Basin, Valu Fa Ridge, 57(12):2819
  nucleogenic, U minerals, 57(5):1053
  solubility, silicate melts, glasses, 57(23/34):5039
Arsenic
  kinetics, arsenate sorption and coprecipitation, ferrihydrite, 57(10):2271
  sorption
    arsenate,ferrihydrite, 57(10):2251
    Au_2S and Au°, As_2S_3 and Sb_2S_3, 57(11):2481
Atlantic Ocean
  plume, mid-Atlantic ridge, 57(13):2939
Aubrite(meteorites)
  metal grains, composition, 57(3):675
  REE, oldhamite, 57(16):4039
Australia
  Adelaide Fold Belt, Sm-Nd dating, 57(8): 1837
  Bega batholith, Pb isotope composition, 57(3):659
  Berridale batholith, Pb isotope composition, 57(3):659
  Hamersley, iron formation, 57(1):187
  Mount Isa, copper deposit, 57(13):2991
  Munni Munni complex, W. Australia, 57(6):12771; 57(18):4467
  Tasmania, *Tasmanites*, 57(17):4205

B

Bacteria
  Chlorobium, Black Sea, sediment, 57(17): 4337
  hydrocarbon gas, Canadian and Fennoscandian shields, 57(23/24):5073
  degradation, organic matter, 57(16):3867
  hydrothermal vents, East Pacific Rise, 57(14):3219
  lactate, decomposition, 57(16):3895
  Methanosarcina, ssp., 57(18):4479
  microbial mat, biochemistry of C, S, and O_2, 57(16):3971
  redox reaction, Fe, Mn, aquifer, 57(8): 1691
Baltic shield
  Pb, isotope composition, sulfides, 57(11): 2555
Barite
  dissolution kinetics, 57(10):2161
  equilibrium, dynamic, 57(18):4435
  solubility, 57(18):4345
Barium
  foraminifera, 57(2):469
  Ganges–Brahmaputra rivers, India, 57(13):2981
  seawater, anoxic, 57(3):537
Basalt
  C, concentration, isotope composition, Juan de Fuca, 57(4):875
  carbonaceous matter, 57(14):3245
  chalcophile, elements, Siberia, 57(9):2001
  lunar, Cr in olivine, 57(2):461
  noble gases, Loihi and Kilauea, Hawaii, 57(4):859
  petrogenesis, Siberia, 57(9):2001; 57(15): 3677
  S, geochemistry, 57(15):3807
  siderophile elements, Siberia, 57(9):2001
  Sn, 57(15):3585
  Tadjoura Gulf, petrogenesis, 57(10):2291
  U-series radionuclides, 57(6):1233
  water–basalt interaction, alteration products, 57(7):1459
  zeolitization, basalt, fresh water, 57(15): 3597
^{10}Be
  Elephant Moraine 87521, lunar meteorite, 57(15):3793
  meteorites, metal, carbon, silicate, 57(15): 3705
  production rate, meteoroids, 57(10):2361
  sediment, Pacific Ocean, 57(1):205
  volcanic rocks, Papua New Guinea, 57(17):4269
Beryllium
  metamorphic rocks, subduction zones, 57(10):2227; 57(21/22):4997

Belgica, carbonaceous chondrites
  petrology, oxygen isotope composition, 57(2):439
Biomarkers
  biodegradation, vanadyl porphyrin, 57(10):2283
  C, isotope composition, 57(1):167
  maturity indicator, 57(15):3661
  porphyrin, Ni, and vanadyl, 57(6):1367; 57(17):4213
  Tasmanites, C, isotope composition, 57(17):4205
Biotite
  partitioning, trace elements, 57(11):2487
Bioturbation
  carbonate dissolution, marine sediment, 57(15):3563
  sediment, Santa Catalina Basin, 57(7):1473
Black Sea
  H_2S chemocline, history of change, 57(17):4337
Boehmite
  solubility
    Al speciation, 57(20):4869
    150 to 250°C, 57(4):747
Boron
  diffusion, silicate melt, 57(8):1741
  metamorphic rocks, subduction, 57(10):2227; 57(21/22):4997
  partitioning, upper mantle, 57(23/24):5053
  volcanic rocks
    57(7):1489
    Papua New Guinea, 57(17):4269
Boron, isotope composition
  oilfield brines
    Gulf Coast, USA, 57(9):2083
    Illinois Basin, 57(4):780
Botswana
  diamonds, Orapa kimberlite, 57(12):2781
Brines
  activities, O and H isotopes, 57(19):4703
  ^{36}Cl, Lake Magadi, Lake Natron, Kenya, 57(7):1607, 1613
  halogens, Proterozoic rocks, Mount Isa, Australia, 57(13):2991
  phase equilibria, KCl–H_2O, NaCl–KCl–H_2O, supercritical, 57(20):4885
  Rhine Graben, Germany, 57(12):2737
  salt precipitation, Dead Sea, Israel, 57(10):2191
  solubility, calcite, 0–90°C, 57(15):3533
  trace metals, Mediterranean Sea, 57(7):1419
British Columbia, Canada
  Powell and Sakinaw Lakes, S speciation, 57(18):4405
Bromine
  sediment, Peru margin, 57(18):4377
Buffering
  heterogeneous systems, open, 57(10):2223

C

^{14}C
  dissolution, carbonate, marine sediment, 57(15):3563
^{41}Ca
  Elephant Moraine 87521, lunar meteorite, 57(15):3793
Cadmium
  bisulfide complexes, structure, stability, NMR spectra, 57(9):1935
  corals, Galapagos, 57(2):347
  ligand exchange, Cd^{2+}, chloride, 57(4):721
  otavite, carbonate, solubility product constant, 57(12):2699
CAIs
  ALH85085, petrology, chemistry, isotope composition, 57(10):2329
  Efremovka, 57(15):3763
  Leoville, 57(15):3763
  Vigarano, type B, 57(1):231; 57(15):3763
Calcite
  calcite–aragonite equilibrium, 57(4):815
  coprecipitation, Pu, 57(7):1447
  dating, ^{230}Th, 57(10):2303
  fractionation, O isotopes, carbonate-water, 57(15):3815
  inhibition, orthophosphate, 57(3):705
  interface, calcite-water, 57(16):4103
  kinetics, calcite precipitation, 57(7):1409
  solid solution, Nd-Ca carbonate, 57(14):3383
  solubility, brine, 0–90°C, 57(15):3533
  spiral growth, 57(2):491
  surface complexation, aqueous solution, 57(15):3505
  synthesis, $CaFe(CO_3)_2$, 57(23/24):5105
Calcium
  ikaite, Mono Lake, California, USA, 57(16):3855
California
  Catalina Schist, B and Be, 57(10):2227; 57(21/22):4991
  Coast Range Mountains, water, 57(5):1093
  Dish Hill, xenoliths, 57(1):105
  Franciscan Complex, Be, B, 57(21/22):4991
  Mono Lake, ikaite, 57(15):3855
  Santa Barbara Basin, 57(1):67
  Sierra Nevada batholith, weathering rate, 57(21/22):5019
Cameroon
  Akongo, laterite, REEs, and Th, 57(18):4419
  kaolinite, Mn^{2+}-bearing, 57(5):1029
Canary Islands
  ignimbrites, post-eruptive alteration, 57(3):631
Carbon
  abundance, IDPs, 57(7):1551
  biogeochemistry
    microbial mat, 57(16):3971
    Spain, 57(9):2041
  DOC, dissolved organic carbon, seawater, 57(9):2149
  organic carbon, sediment, Arabian Sea, 57(5):1009
  preservation, marine shale, 57(2):303
  SiC grains, presolar, 57(12):2869
Carbon, isotope composition
  basalt glass, Juan de Fuca Ridge, Pacific Ocean, 57(4):875
  biomarkers, 57(1):167
  biomarker hydrocarbons, 57(17):4205
  diamonds, Botswana, 57(12):2781
  goethite, Neda Formation, Wisconsin, 57(11):2599
  hydrocarbon gases, Canadian and Fennoscandian Shields, 57(23/24):5073
  kerogen
    tasmanite, oil shale, 57(17):4205
    U ore, Elliot Lake, Ontario, 57(14):3251
  methane
    bacterial, 57(16):4015
    crystalline rocks, 57(23/24):5087
  phosphorite, Florida platform, 57(1):131
  porphyrin, 57(6):1307
  SiC grains, chondrites, 57(12):2872
  SiC, Murchison, 57(16):4059
Carbonaceous chondrites
  Acfer 182, 57(11):2631
  ALHA77307, solar nebula, dust, 57(7):1521
  alteration, aqueous, 57(12):2843
  amino acids
    Murchison, 57(14):3473, 3475
    Strecker synthesis, 57(19):4713
  C_{60}, PAHs, 57(4):933
  carbonate minerals, 57(12):2843
  mineral composition, 57(13):3123
  Murchison, organic compounds, 57(19):4745
  organic compounds, 57(4):907
  Renazzo-type
    implications, 57(7):1567
    paired, Sahara Desert, 57(7):1587
  S, isotope composition, 57(13):3159
  SiC grains, Murchison, 57(16):4059
Celestite
  solubility, 57(18):4345
Cellulose
  H, isotope composition, nonexchangeable H, 57(17):4249
Cerussite
  equilibrium, dynamic, 57(18):4435
Cesium
  Moon, 57(15):3785
  radioactive isotopes, sediment, 57(13):2959; 57(14):3493
Chernobyl, Russia
  ^{137}Cs, release, 57(13):2959
China
  meteorites, 57(5):1115
Chlorine
  apatite, Munni Munni Complex, W. Australia, 57(18):4467
  vapor transport, 1000°C, 57(15):3519
Chlorine, isotope composition
  measurement, high precision, 57(12):2907
Chlorophyll
  degradation, sediment, Long Island Sound, 57(1):147
Chondrite meteorites
  cosmogenic radionuclides, ^{10}Be, ^{26}Al, 57(15):3707
  metamorphism, reduction, 57(8):1867
  noble gases, 57(5):1115
  olivine grains, metamorphism, 57(12):2853
  oxidation, metamorphism, 57(5):1105
  reduction, 57(8):1867
  S, isotope composition, 57(13):3171
  SiC grains, presolar, 57(12):2869
Chondrules
  Acfer 087, olivine chondrule, 57(7):1589
  ALHA77307, 57(7):1521
  mineral composition, carbonaceous chondrites, 57(13):3123
  origin, 57(9):2101
  thermoluminescence, Semarkona, 57(9):2101
Chromitite
  Re-Os dating, 57(16):4029
Chromium
  adsorption, Cr^{3+}, α-Fe_2O_3, 57(19):4843
  olivine, lunar basalt, 57(2):461
  sorption, oxide minerals, 57(10):2389

^{36}Cl
brine, Magadi-Natron basin, 57(7):1607, 1613
Elephant Moraine 87521, lunar meteorite, 57(15):3793
Clay Minerals
adsorption, Pb, 57(16):3885
fractionation, H isotopes, clay minerals-water, 57(13):3200
isotope composition, O and H, Kupferschiefer, Germany, 57(8):1799
CO_2
fractionation, O isotopes, CO_2-H_2O, 57(13):3195
gases, convergent plate boundary, New Zealand, 57(14):3427
Coal
alkylcyclohexane, alkyl-benzene, 57(4):837
Colombia
Nevado del Ruiz, U-series radionuclides, 57(6):1215
Colorado
Green River Formation, S geochemistry, 57(13):3023
Two Buttes, olivine, Ni-rich, 57(1):123
Complex formation
acetate, 53(7):1393
Au^{3+} chloride
ligand exchange, 57(4):721
complexes, 57(6):1243
Au, fulvic acid, 57(17):4179
bisulfide complexes and Cd, 57(9):1935
ferric-thiosulfate, decomposition, 57(15):3555
ferrous chloride, 57(7):1393
organometallic complexes, acetate, thermodynamic properties, 57(20):4899
PGE sulfide complexes, 57(11):2451
REE-carbonate ions, 57(2):295
stability, $Si(OH)_5^-$, 57(16):3847
Connecticut, USA
retardation, Ra and Rn, aquifer, 57(3):597
Conodonts
REEs, 57(11):2507
Cooringite
molecular composition, 57(9):2053
Copper
Cu bisulfide, multinuclearity, 57(1):15
solubility, Cl-bearing solution, high T and P, 57(9):1905
Corals
correlation between trace elements and $^{234}U/^{238}U$, 57(2):257
Mn and Cd, Galapagos, 57(2):347
Pu, ^{90}Sr, 57(7):1447
Cosmogenic radionuclides
^{10}Be, ^{26}Al, mineral phases, meteorites, 57(15):3705
^{10}Be, sediment, Pacific Ocean, 57(1):205
^{14}C, marine sediment, 57(15):3563
^{36}Cl, brine, 57(7):1607, 1613
Elephant Moraine 87521, lunar meteorite, 57(15):3793
^{81}Kr, terrestrial ages, eucrites, Yamato, Antarctica, 57(8):1857
production rate, meteoroids, 57(10):2361
soil, Mars, 57(19):4627
^{135}Cs
coastal sediment, 57(14):3493
Cutin
marine sediment, 57(5):945

D

Dead Sea, Israel
salt precipitation, 57(10):2191
Denmark
Skagerrak, sediment, 57(16):3867
Stevns Klint, Fish Clay, 57(7):1433
Diagenesis
CO_2 fugacity, evolution, 57(5):1017
coastal sediment, trace elements, 57(19):4639
coral skeletons, 57(2):257
Fe hydroxide, lacustrine sediment, 57(18):4391
Green River Formation, 57(13):3023
metal-rich sediment, Mediterranean, 57(3):527
organic matter
high *T* and *P*, 57(14):3238
kinetics, 57(6):1349
thermal maturation, 57(15):3661
S-bearing sediment, Santa Barbara Basin, CA, 57(1):67
Diamonds
C, isotope composition, Botswana, 57(12):2781
N, concentration, Botswana, 57(12):2781
Diffusion
B, melt, haplogranite, 57(8):1741
effect on thermometry, 57(11):2571
He, olivine, clinopyroxene, 700 to 1400°C, 57(6):1313
methane, marine sediment, 57(3):571
multicomponent
MgO–Al_2O_3–SiO_2,
CaO–MgO–Al_2O_3–SiO_2 melts, 57(18):4453
silicate melts, 57(9):2019
Sr, apatite, 57(19):4653
sulfate, marine sediment, 57(3):571
Diopside
dissolution kinetics, 57(2):285
Dolomite
Mn^{2+} partitioning ratio, effect of Fe^{2+} and Fe^{3+}, 57(5):1071
ESR, 57(5):1071

E

Earth
Rb, Cs, concentration, 57(15):3785
Efremovka
refractory inclusion, 57(15):3763
Emerald
Gravelotte, Transvaal, South Africa, 57(1):89
EPR(Electron paramagnetic resonance)
kaolinite, Mn^{2+}-bearing, 57(5):1029
Equation of state
NaCl-H_2O, supercritical, 57(8):1657
NaCl–KCl–H_2O, supercritical, 57(20):4885
Equilibrium constant
flow-through reactor, computer code, 57(3):685
ESR (Electron spin resonance)
dolomite, synthetic, 57(5):1071
Eucrite (meteorites)
terrestrial ages, Yamato Mountains, Antartica, 57(8):1857
Yamato 792769, Antartica, 57(9):2111
EXAFS
bisulfide complexes, Cu and Zn, 57(1):15
sorption, As ferrihydrite, 57(10):2251

F

Ferrihydrite
As, sorption, 57(10):2251
kinetics, sorption and coprecipitation, arsenate, 57(10):2271
Mössbauer spectroscopy, soil, Mars, 57(19):4583
Florida, USA
phosphorite, origin, 57(1):131
sediment, porewater geochemistry, 57(6):1253
Fluid inclusions
emeralds, Gravelotte, Transvaal, South Africa, 57(1):89
hydrocarbon, molecular composition, 57(15):3641
metasediment, Mount Isa, Australia, 57(13):2991
REE determination, ICP–MS, 57(18):4513
Sphalerite, Sr isotope composition, 57(2):420
Fluorescence
DOC determination, 57(9):2149
Fluorine
foraminifera, controlling factors, 57(2):335
Foraminifera
Ba, 57(2):469
flouride content, 57(2):335
France
Massif Central, zeolitization, 57(15):3597
FTIR (Fourier transform infrared spectroscopy)
torbanite, chemical characterization, 57(11):2529
Fullerene
geochemistry, 57(8):1879
Fulvic acid
complexation, Au, 57(17):4179
Fungus
degradation, wood lignin, 57(16):3985

G

Gabon
Oklo, natural nuclear reactor, 57(6):1351
Galapagos Islands
corals, Mn and Cd, seasonal cycles, 57(2):347
Garnet
heat capacity, almandine, 57(17):4191
O, isotope composition, Vermont, 57(11):2585
phase equilibria, 57(17):4191
REEs
partitioning, 57(1):47
leucogranite, 57(16):4095
zoning, O, isotope composition, 57(11):2613
Geobarometry
olivine–opx–FeS, 57(10):2213
Geochronology
ASUKA 881757, lunar meteorite, 57(19):4687
chromitite, Stillwater Complex, 57(16):4029
Cornubian batholith, England, 57(8):1817
ilmenite, U-Pb method, 57(18):4533
impure calcite, ^{230}Th, 57(10):2303
lunar granite, K-Ca method, 57(19):4827
$^{187}Os/^{186}$ vs. $^{187}Os/^{188}Os$ method, theory, 57(16):4119

Pb-Pb dating, detrital zircon grains, 57(17):4257
Pb-Pb method, granites, Australia, 57(3): 641
sphene, U-Pb, Th-Pb, 57(2):355
U minerals, 57(5):1053
U, Th-series disequilibria, lava, Mt. Etna, Italy, 57(6):1169
U-series disequilibrium, hydrothermal deposits, 57(5):1221
Geothermal water
Ra, Yellowstone Park, 57(6):1203
Rhine Graben, Germany, 57(12):2737
Germany
Kiel Bight, diagenesis, coastal sediment, 57(19):4639
Kupferschiefer, clay minerals, 57(8):1799
Rhine Graben, brines, 57(12):2737
